STOP

What is AR

AR is a computer base, reading management and motivational system designed to encourage students to read. Each student is given an individual reading goal based on their reading abilities.

GET READY

ZPD

Reading ability is based on their reading grade equivalent (GE) score from the STAR Reading test. The GE score is used to determine each student's zone of proximal development (ZPD) range which is used to determine the level of book difficulty for the students.

GO

AR Goals

AR uses a 30-minute daily reading practice and the student's ZPD in calculating a student's reporting period point goal. Studente's testing average goal is set at 90%. Student's can reaach cerificaiton levels based on their reading.
